AI Answer Verification Checklist

Turn a confident answer into a short list of claims you can actually check

1. Mark the claims that could change your decision

- [ ] Current price, plan, limit, availability, or eligibility.
- [ ] Date, deadline, opening hour, rule, law, policy, or requirement.
- [ ] Number, calculation, statistic, comparison, quote, or attribution.
- [ ] Safety, medical, legal, financial, or other high-impact advice.

2. Ask for a claim list

Turn your previous answer into a checklist of factual claims. For each claim, show the exact source link, publication or update date, and the sentence or section that supports it. Mark anything you cannot support as unverified. Do not create a source or silently fill a missing detail.

3. Verify outside the same chat

- [ ] Open the cited source yourself. Prefer the official provider, government, standards body, or original research.
- [ ] Check that the source is current and says what the answer claims.
- [ ] Repeat calculations from the original numbers. Check units and time periods.
- [ ] Look for missing conditions, exceptions, plan differences, and regional limits.

Claim log

- [ ] Claim: _____ Source: _____
- [ ] Source date: _____ Supports claim? [ ] Yes [ ] Partly [ ] No
- [ ] What I changed or still need to check: _____
- [ ] Decision if this remains uncertain: _____

A citation is not proof until the source is open, current, relevant, and correctly represented.
