# AI Study Guide Builder

Keep the AI inside your source material and turn notes into practice you can verify

## Scope

- [ ] Class, topic, or exam: _____
- [ ] Source notes, pages, or approved materials: _____
- [ ] What the instructor emphasized: _____
- [ ] What I still do not understand: _____

## Source-only prompt

> Use only the notes or sources I provide. Create a study guide with: (1) a plain-English overview; (2) key terms and definitions; (3) relationships or steps; (4) five retrieval questions; (5) three application questions; and (6) a gap list of anything the source does not explain. Do not add outside facts or silently correct the notes. Cite the source page or heading for every answer.

## Practice log

- [ ] Question I missed: _____
- [ ] My wrong or incomplete idea: _____
- [ ] Correct answer from the source: _____
- [ ] Source page or heading: _____
- [ ] Next review date: _____

## Quality check

- [ ] Every definition, date, formula, and answer can be found in the assigned source.
- [ ] The guide includes questions that require recall and application, not only recognition.
- [ ] Unclear or missing material is listed as a gap instead of guessed.
- [ ] I tested myself before rereading the answer.

**A neat study guide can still be wrong. The assigned source remains the authority for the course.**
